What are Professional Builders and Sparkle Cleans?

What are Builders and Sparkle Cleans?

Building and Sparkle Cleans are more than simply the removal of dust and debris that is generated from works carried in homes and business. Whilst this is part of what is involved in preparation for handing over the building to its new owners, it is important to understand a few key considerations about Builders and Sparkle Cleaning services.

They are ideally to be carried out by a professional company such as [Champion services](#) to ensure a complete cleaning service from removing dust and debris right through to leaving the property Sparkling and ready to hand over to the tenant or owner.

As some construction may still be underway when the property is initially attended, it is important that a risk assessment is carefully carried out to ensure the safety of everyone on site during the building work and the cleaning. Also a Method Statement should be completed which explains the intended work procedure so the cleaning team are clear about the requirements, the materials and equipment needed and fully aware of what to do should any emergencies arise

The Sparkle Cleaning should be carried out to a High standard once all the renovation or building work is complete and all the construction workers and equipment have been removed from the property.

What Is Included in a Builders and Sparkle Clean?

- The safe and efficient removal of standard waste.
- The cleaning of dust and debris resulting from building or renovation work.
- Polish stainless steel.
- Washing internal windows and window sills.
- The removal of paint marks.
- Hard floor cleaning.
- Communal areas cleaned and sanitised.
- Steam cleaning
- Inside Cupboards and Drawers cleaned
- Bathrooms Deep Cleaned
- Glass and Mirrors Polished

The Big Question.....What Is Going to Cost?

The Annoying Answer.....It Depends!

Every Property Developer, Renovation Project, Building and Resident or Owner are unique. At Champion Services we understand that and always quote for a bespoke service. It is impossible for us to give prices before visiting the location, discussing the building work that will be carried out and assessing the debris that will be left behind. Also we need to take in to account the location, congestion and parking charges as well as the accessibility and size of the property.

There may be cleaning requirements that have not been mentioned in this guide and it is essential that we visit the property to carry out the Risk Assessment and enable us to compile the Method Statement and ultimately provide you with an accurate Quote.

Don't worry you are under no obligation to go ahead with the [Builders and Sparkle](#) Cleaning once we have visited and quoted, but obviously we hope you do!

To arrange a visit or a quote or to just ask any questions please [Contact Us](#) here.

Why Choose Champion Services for your Builders and Sparkle Cleaning?

We are a family run business and we always work honestly and respectfully. We always do what we say we are going to do and will stay at the property until the job is completed to a high standard. We are human beings and as such it is possible, on a rare occasion, to miss something and if that should happen, we will return to resolve any issues as a matter of urgency.

All members of our cleaning team are uniformed, fully trained and happy carrying out their work. Each member of our team is respected and valued and that reflects in their appearance, manner and work and that in turn benefits you as our client.

We are part of the [B1G1](#) Community which means that as we have a positive impact on our clients, we pass that on by creating Impacts around the world in line with the Global [Sustainable Developmental Goals](#) (SDG's). We always inform our clients of the area we have created those impacts on their behalf and with regular clients we ask them to choose the goal that resonates with them.
